

**F**OR 17 years only one kind of Form-A-Gasket has been used for motor assembling work. The product dries fast . . . and sets hard.

Unions made with it stand high pressure and continual vibration, because the Form-A-Gasket cements the entire assembly into a solid joint.

This fast-drying...hard-setting Form-A-Gasket is now known as "Form-A-Gasket Number 1."

• • •

A new kind of Form-A-Gasket is finding favor in the automotive trade. The product acts as a seal . . . but not as a cement.

Like Form-A-Gasket Number 1, it makes leak-proof, pressure-tight assemblies. But these unions disassemble easily . . . Solid gaskets are not cemented to the flange surfaces . . . The layers of Form-A-Gasket are soft, and may readily be removed.

This non-hardening...pliable Form-A-Gasket is known as "Form-A-Gasket Number 2."

Write for your copy of the new Manual on Form-A-Gasket Number 1 and Number 2.

Form-A-Gasket is but one of many products manufactured by Permatex for Repairmen and Car Owners.

Touch-Up Black Lacquer for example, is a wonderful re-finish for scratched and dented cars. It holds its lustre indefinitely and may be cleaned and polished just like the original lacquer.

Fabric Quick Cleaner is another of those products that possess certain desirable qualities, including a perfume that appeals to the Service Man and Car Owner.

Chromium Polish is a surprising item. It produces a blue-white lustre that all admire in Chromium Plate and which is lost when water alone is used for cleaning.

Permatex products are distributed by all leading jobbers. The new catalog for 1932 is now ready. A copy is yours for the asking.
